Ubleen																				X

### NOTE:

Some early blooming European pears will cross pollinate with late blooming Asian pears.  
 Bees generally are not as attracted to pear blossoms as they are to apple blossoms.  
 To help with pollinization we recommend mason bees. They are an ideal addition to your garden to increase production of all fruits and vegetables.

### DIRECTIONS for USE:

1. From the left-hand column select a cultivar you are interested in growing.
2. Check across the chart; the unmarked boxes will be a reliable pollinizer for the cultivar you
