Roxbury Russet	*					X						X				X			X					X																
Spitzenberg	*						X					X				X			X					X																

NOTE:

The following varieties do not make good pollinizers since these are triploid plants which do not pollinate other trees. These varieties must have another tree to pollinate themselves plus the pollinizer will require another to pollinize it: GRAVENSTEIN, JONAGOLD, KING & MUTSU

* These are the best apples for ripening in Western Washington.

X These are not reliable pollinizers and must have another tree to pollinate.

DIRECTIONS for USE :

1. Select a cultivar you are interested in growing from the left hand column.
2. Check across the chart; the unmarked boxes will be a reliable pollinizer for the cultivar you have chosen.
